PROGRAM

Agenda to follow, these are some of the topics and sessions you can expect:

- Guest speakers providing Industry thought leadership on the new energy economy, including energy and FCAS market participation, retailer agreements, EV power management, PV and BESS modelling, project design and delivery.
- AZZO's CEO will present on how AZZO's EnergyX IoT platform is facilitating the energy transition.
- Hear how AZZO's EnergyX IoT platform can bring together various stakeholders and technologies to unlock energy ecosystems and achieve your sustainability outcomes.
- Hear from other University and Education attendees on their sustainability road maps and Energy case studies.
- Hear from AZZO on specialist topics and solutions, including power quality, cybersecurity, microgrid control systems and much more.
- Participate or enjoy listening to a facilitated discussion to unpack the key challenges Universities and Education institutions are trying to solve with their energy sustainability goals.
- Enjoy mixing with other attendees and industry experts in a friendly collaborative environment.
